

Ring Sizing Guide

CUT OUT

SHOULD MEASURE 3.5 INCHES (88.9MM)

HELPFUL HINTS

Make sure your print settings show a scaling of "none" (or 100%).

Measurements are most accurate when hands are warm and toward the end of the day.

Showing a ring size of 6.5

MEASURING YOUR RING SIZE

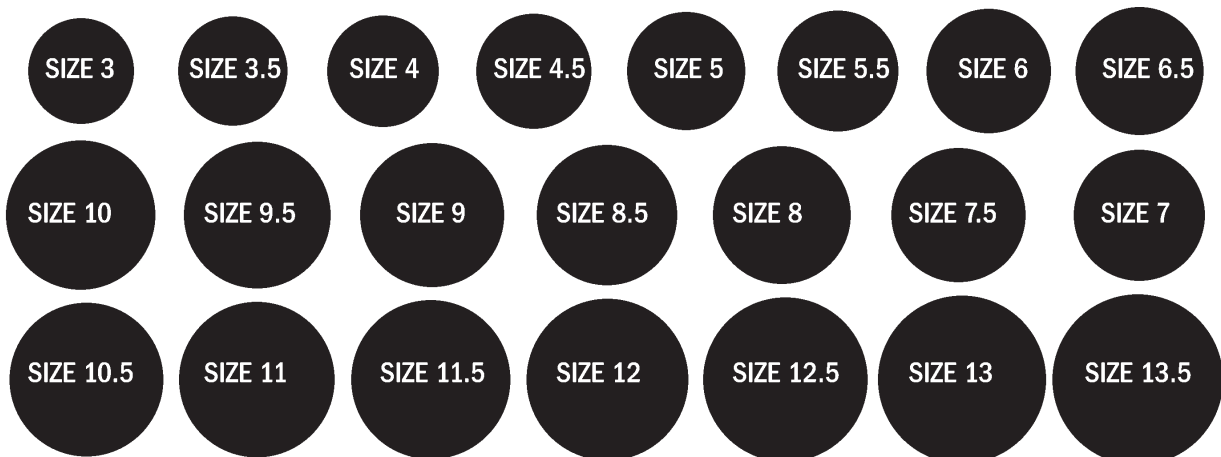

1. Print this page, making sure to print it at full size. To check, use the inch or mm scale above.
2. Cut out the Ring Sizer strip.
3. Wrap the Ring Sizer around your intended finger with the numbers out. Wrap snugly but comfortably around the largest part of your finger, making sure it will clear the knuckle.
4. The small "cut here" arrow will be pointing to your ring size. For example, the mark between 6 and 7 is US/Canada ring size 6.5

Existing ring size of 6.5

MEASURING AN EXISTING RING

If you have an existing ring the correct size, or if you plan to purchase a ring for a loved one and wish to keep the gift a secret, sneak an existing ring away long enough to measure it against the sizing chart below.

Can't find the size you need online at Meijer.com? Additional ring sizes are available at Meijer stores. Just in case, you have a full 60 days to return your jewelry from Meijer.com - in store or online!
